ANNUALIZED REVENUES*	\$2.1B

Align Technology is a global medical device company engaged in the design, manufacture and marketing of the Invisalign® system, the most advanced clear aligner system in the world, and iTero® intraoral scanners and services for orthodontic and restorative dentistry. Align's products help dental professionals achieve the clinical results they expect and deliver effective, cutting-edge dental options to their patients.

INVISALIGN CLEAR ALIGNERS

The Invisalign system is used for straightening teeth with a series of custom-made aligners for each patient. Invisalign treatment is offered in over 100 countries across the globe. Invisalign treatment is prescribed to teenage and adult patients through Invisalign-trained orthodontists or general practitioner dentists (GP dentists). Patient pricing for Invisalign products is determined by the doctor, depending on the treatment plan.

ITERO SCANNER AND SERVICES

The iTero Element scanner uses patented parallel confocal imaging technology to capture an accurate 3D digital impression image of the patient's dentition. The 3D digital file can then be used for various procedures and services including, milling of restorative units such as crowns, implant abutments, and orthodontic workflows. Only the iTero intraoral scanner models feature Invisalign treatment applications.
